

Only Alabama general acute care hospitals are eligible for tiering within the Hospital Tiered Network. Rehabilitation Hospitals, Psychiatric Hospitals, Specialty Facilities, Out of State Hospitals, VA Hospitals, and Long Term Care Hospitals are exempt from participating. The listing below highlights all eligible facilities along with corresponding tier rankings. All facilities not included on this list are subject to standard in-network benefit design.

Within the Hospital Tiered Network, hospitals are categorized into one of three “tiers”, based on their performance in four primary areas of interest (Fiscal, Patient Safety, Quality, and Patient Experience). Hospitals designated as “Tier 1” are recognized as having attained the highest level of compliance across these areas. In order to achieve Tier 1 status, hospitals must meet both cost and quality requirements. Additional detailed information can be obtained at www.bcbsal.org.
