

Changes to the electronic Health Care Claim Status Request – ANSI ASC X12N 276 and Health Care Claim Status Response – ANSI ASC X12N 277

Health Insurance Portability and Accountability Act (HIPAA) electronic transactions must be upgraded to Version 5010 no later than January 1, 2012, per the **Health Insurance Reform; Modifications to the Health Insurance Portability and Accountability Act (HIPAA); Final Rules**. In preparation for this transition, the purpose of this article is to communicate changes from the current HIPAA Version 4010A1 to the new version regarding electronic claim status requests and responses. Articles addressing the other HIPAA transactions are/will be available under separate cover. It is recommended that practice management software vendors and clearinghouses refer to the version 5010 implementation guides for each transaction to identify all changes, additions and deletions.

HIPAA Implementation guides for version 5010 are called TR3s (Type Report 3) and are available on the Washington Publishing Company's website at: <http://www.wpc-edi.com/content/view/817/1>

The ERF and 277 HCCA files contain claim submission status information. Additionally, the 999 transaction will replace the 997 transaction for Standard status (Level 1) and Implementation status (Level 2) reporting. A text file interpretation of the 277 HCCA will also be downloaded to FTP directories. More information about these transactions and our transition plans for them will be available soon. The Acknowledgement TR3 documents are located on the WPC website at: <http://www.wpc-edi.com/content/view/1001/1/>
