

Are your prescription medicines covered by your health plan?

If you use a non-covered drug, you may pay the full price.

Talk to your doctor about switching to one of the alternative drugs listed on the formulary.

SourceRx 1.0 is your formulary—a list of covered drugs

Prime Therapeutics (Prime) is trusted by your employer or health plan to help you get the medicine you need to feel better and live well. Our pharmacy experts work hard to make medicine more affordable for everyone.

SourceRx 1.0 is the list of drugs covered by your health plan. It was designed to push back against today's high costs for medicine. SourceRx 1.0 works by offering alternatives to more expensive drugs. This helps people get the right medicine at the best cost.

Some drugs will not be listed on the SourceRx 1.0 formulary

If a drug is not on the formulary, it will not be covered by your health plan. This publication lists many of the non-covered drugs along with alternative drugs that are covered. The list is divided into four sections:

1 Non-covered with preferred alternatives

Alternatives to non-covered drugs—potential options at better costs.

2 Standard non-covered drugs

Lists reasons why these drugs are not covered.

4 Non-covered due to high costs

Safe, effective alternatives are available at lower costs.

Additionally, some health plans or groups may choose not to cover drugs for the following reasons:

3 Non-covered with over-the-counter alternatives

For prescriptions drugs that have an effective medicine available from your pharmacy.

The formulary guide represents changes (non-covered and covered alternatives) that may not be effective until January 1, 2019. The formulary is reviewed quarterly and changes are made to ensure clinical appropriateness of the formulary while giving members access to lower cost alternatives. Notifications are sent out each quarter to affected members of new non-covered drugs.
