## Provider-Administered Specialty Pharmacy Drug Management List

**Definition of specialty medications:** Specialty medications are generally prescribed for people with complex or ongoing medical conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. These high cost medications also have one or more of the following characteristics: injected or infused, but some may be taken by mouth; unique storage or shipment requirements; additional education and support required from a health care professional; and usually not stocked at retail pharmacies.

**FOR PEEHIP Members Only** Coverage excludes the provider-administered medications outlined in this drug policy from being accessed through a specialty pharmacy. It must be obtained through buy and bill. Lemtrada is the only exception, and Lemtrada will require the use of a Specialty Pharmacy

**Note:** In order for a member to receive in-network benefits for the following specialty drugs, the specialty pharmacy filing the claim must contract with the Blue Cross and Blue Shield Plan where the provider is located. In-network specialty pharmacies are:

Accredo Health Group, Inc. (1-888-608-9010), CVS/Caremark (1-800-237-2767) and AllianceRx Walgreens Prime (1-877-627-6337).

\*Limited distribution

Limited distribution drugs are medications that may have special dosing requirements or lab monitoring that need to be followed very closely. Because of this, the manufacturer or Food and Drug Administration sometimes chooses to limit the distribution of their drug to only a few pharmacies.

This list is subject to change without notice.

Neither this Specialty Pharmacy Drug Management List, nor the successful adjudication of a pharmacy claim, is guarantee of payment.
