

Prescription Drug Guide

Please consider talking to your doctor about prescribing preferred generic and brand medications, which may help reduce your out-of-pocket costs. This list may help guide you and your doctor in selecting an appropriate medication for you.

Introduction

The Prescription Drug Guide includes all Preferred Brand drugs and a partial listing of Generic drugs. Brand name drugs not listed in this Prescription Drug Guide are Non-Preferred Brands. A drug may not be added to the Preferred Brand tier for reasons including safety or effectiveness, or because a similar, more cost-effective drug is already available as a Preferred Brand or Generic drug.

Physicians are encouraged to prescribe drugs listed in this Prescription Drug Guide. Members are encouraged to show this Prescription Drug Guide to their physician and pharmacist.

Member Prescription Benefit

The prescription benefit is multi-tiered, placing prescription drugs into one of the following copayment levels.

Tier 1 – Lowest copayment – Generic drugs and select Preferred Brand drugs– listed and unlisted generic drugs

Tier 2 – Middle copayment – Preferred Brand drugs – all shown in the Prescription Drug Guide

Tier 3 – Highest copayment – Non-Preferred Brand drugs – unlisted

Tier 4 – Specialty (if applicable)

Coverage is limited to prescription products approved by the Food and Drug Administration (FDA) as evidenced by a New Drug Application (NDA), Abbreviated New Drug Application (ANDA), or Biologics License Application (BLA) on file. Any legal requirements or group specific benefits for coverage will supersede this (e.g., preventive drugs per the Affordable Care Act).

The drug benefit includes most prescription drugs, although some restrictions and exclusions apply. Investigational drugs and drugs indicated for cosmetic purposes (e.g., Propecia for hair growth) are not covered. Coverage and copayment levels vary depending on the plan. Drugs that require Prior Authorization, Step Therapy, or that have Dispensing Limits are noted in the Prescription Drug Guide.

Pharmacy and Therapeutics (P&T) Committee

The P&T Committee is comprised of independent practicing physicians and pharmacists. The Committee meets at least quarterly. Newly marketed prescription drugs may not be covered until the P&T Committee has had an opportunity to review the drug, to determine whether the drug will be covered and if so, which tier will apply based on safety, efficacy, and the availability of other products within that class of drugs. If your physician feels that a new drug is medically necessary prior to P&T Committee evaluation, a non-formulary exception request for coverage may be submitted.

Brand Drugs and Generic Drugs

Classification

Prescription drugs are classified as either a Brand drug or a Generic drug. The Brand or Generic status provided is by a nationally recognized company providing drug product information. The Brand/Generic status for a specific drug/specific marketer can sometimes change over the life of a product in the marketplace and change from Brand to Generic (or Generic to Brand). Such changes might change your copayment share. Brand drug or Generic drug status is never based upon a product having a trade name. Generic drugs often have trade names.

Generic Substitution

Generic drug utilization is encouraged as a way to provide high quality drugs at a reduced cost. Generic drugs are as safe and effective as their brand counterparts, but are usually less expensive. Generic drugs are manufactured under the same strict requirements of FDA's current Good Manufacturing Practice regulations required for Brand drugs and cover the manufacturing, and identity, strength, purity and quality.

An FDA-approved Generic drug may be substituted for the Brand counterpart when it:

- Contains the same active ingredient(s) as the brand drug
- Is identical in strength, dosage form, and route of administration
- Is therapeutically equivalent and can be expected to have the same clinical effect and safety profile.

To encourage use of Generic drugs, Tier 2 Preferred Brand drugs typically move to Tier 3 after an equivalent generic version becomes available.

Specialty Drugs

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral or injectable medications that can either be self-administered or administered by a health care professional.

Some members must obtain their specialty drugs from the Pharmacy Select Network as the preferred provider. If the preferred provider is not utilized you may be responsible for up to 100 percent of the drug cost. Your plan may have a different coverage level for self-administered specialty drugs. If you have questions about your coverage for specialty drugs or your prescription drug benefit, call the number on the back of your ID card..

Compound Drugs

Compound drugs are defined as a drug product made or modified to have characteristics that are specifically prescribed for an individual patient when commercial drug products are not available or appropriate. To be eligible for coverage, compounded drugs must contain at least one FDA-approved prescription ingredient and must not be a copy of a commercially available product. All compounded drugs are subject to review and may require prior authorization. Drugs used in compounded drugs may be subject to additional coverage criteria and utilization management edits. Compounds are covered only when medically necessary. Compound drugs are always classified as the highest cost-sharing non-specialty drug Tier.

Contraceptives

Some or all of the contraceptive methods or prescription drugs listed in this Prescription Drug Guide may not be covered under your plan because of your employer's religious beliefs. To find out if contraceptive methods and prescription drugs are excluded, you may find this information in the exclusions section of your benefit booklet or you may contact your group administrator.

Utilization Management

Your Plan is committed to supporting proper selection and use of drugs for its members. To help assure these goals are met, several programs have been developed to promote drug selection that encourages both effectiveness and safety. Preferred generic or brand drugs requiring Prior Authorization or Step Therapy, or drugs with Dispensing Limits will be noted in the Therapeutic Class Drug List portion of the Prescription Drug Guide.

Prior Authorization

Some drugs require Prior Authorization (**PA**) because of their high potential for misuse or overuse. Drugs selected for Prior Authorization may require that specific clinical criteria are met before the drugs will be covered under a member's prescription benefit. Approval is required for claims to process at network pharmacies.

Dispensing Limits

Dispensing Limits (**DL**) identify gender or age restrictions, and/or the maximum quantity that can be dispensed over a specific period of time. Limits are in place to encourage appropriate drug utilization, enhance member outcomes, and reduce drug benefit costs. Limits are typically developed based upon FDA-approved drug labeling.

Step Therapy

Step Therapy (**ST**) programs help manage the cost of expensive drugs by redirecting members to safe, effective and less expensive alternatives. Drugs included in the Step Therapy program require a more cost-effective prerequisite drug be tried before the Step Therapy drug will be approved for coverage. If the member meets the prerequisite requirement, the requested drug will be covered automatically without requiring review. If prerequisite drugs are not found in the claims history, Prior Authorization may be required. Drugs and drug categories included in the Step Therapy program are subject to change.

Notice

The purpose of the Prescription Drug Guide is to provide a guide to coverage. The Prescription Drug Guide is not intended to dictate to physicians how to practice medicine. Physicians should exercise their medical judgment in providing the care they feel is most appropriate for their patients.

Neither this Prescription Drug Guide, nor the successful adjudication of a pharmacy claim, is guarantee of payment.
